ABOUT US

What is ISFA?

Over the past 25 years, the International Surface Fabricators Association (ISFA) has built a community around fabricators and specifiers of manufactured surfaces. Our aim is to support the industry by providing fabricators with opportunities to learn about new products, market trends, best practices in business, and other industry news and events.

As a trade organization, our community extends well past our membership base to reach more than **12,000 industry professionals**.

In addition to our quarterly flagship publication, **Countertops & Architectural Surfaces**, which provides exclusive in-depth editorial coverage of the surfacing industry, we also have several outreach initiatives including:

- Digital newsletters
- Networking events
- Training sessions
- Manufacturer & fabricator shop tours
- Two websites
- Direct email marketing
- Sponsorship opportunities

The bottom line: **ISFA can help you reach the entire surfacing community, your potential customers.**

We're here to foster growth in this industry. ISFA will work with you to build awareness around your brand while providing important information and opportunities for fabricators, designers, architects, other specifiers and even consumers.

ISFA's Flagship Publication: Countertops & Architectural Surfaces Magazine

ISFA releases a quarterly magazine in support of the decorative surfacing industry.

Find out all the latest news, educational opportunities, material trends and business strategies that elevate and perpetuate the industry.

In addition, each fall we release a Buyers' Guide which features the latest and greatest surfaces, tooling and services in our industry.

Meet Our Readers

Circulation: 12,000

Countertops & Architectural Surfaces is printed quarterly and distributed to ISFA members and additional subscribers. It is also available digitally on ISSUU.

The circulation sits at approximately 12K, including print and digital. The audience comprises fabricators, millworkers, kitchen & bath dealers, general contractors, architects, designers and other industry professionals.

ISFA sponsors receive priority coverage across all channels, including the magazine, as well as deep discounts on advertising and marketing opportunities.

Leverage our list to get the word out about new products and other developments. Our readers are a perfect target for your message.

Solid Surface Meets Marble
The Marvel of Marble.
The Performance of Solid Surface.

By Joseph Ella

It is well established that a marble surface has the power to elevate and beautify any space. From dramatic veining to honey combs, marble countertops continue to be synonymous with refined taste and classic appeal. More recently, the pristine look of white marble is trending in modern kitchens everywhere. White marble offers other veining and design flexibility that fits a variety of styles and master color palettes. Plus, with the rise of warmer tones for cabinetry and fixtures, white marble is the ideal choice in a bright home or contemporary commercial space. So why are people choosing solid surface to recreate the beautiful presence of white marble?

In short, today's solid surface technology represents all of the characteristics of great marble—and will maintain the stunning appearance that homeowners love. Engineered surfaces manufactured by the Wilmett team responded to consumer demand with new selections and innovative improvements.

Comparing Solid Surface to Marble

There are many reasons to love traditional marble, but its natural and not without its drawbacks. Marble is composed of organic stones and requires careful cleaning due to its porous nature. It is also susceptible to scratching and requires regular sealing.

In contrast, solid surface is a highly durable, repairable material and capable of withstanding everyday use without

...excess maintenance. Wilmett Solid Surface, for instance, delivers the vibrance of nature paired with the performance of engineering.

Designs from Wilmett are complete with seamless construction, impact resistance, and the peace of mind that every countertop will perform long into the future. Solid surface can also be installed as a backsplash to match the sophisticated countertop with cohesive style. To top it all off, it is also more economical than traditional marble due to its affordable installation and long-term maintenance costs.

Nature's Beauty is Trending

Wilmett recently upgraded their solid surface lineup to include the Crafted Collection, an exclusive selection of three trending white marble designs. Ideally suited to residential environments, the Crafted Collection brings the organic appeal of prestigious white marble to any home décor. By utilizing the world's finest raw materials of Carrara marble, the raw beauty of Calacatta stone, and the high-contrast allure of Statuario marble, this collection features distinctive structures and movement.

In the world of solid surface countertops, the line between human-made engineering and natural stone is becoming very blurred. As homeowners continue to gravitate toward the look of nature, Wilmett is building its solid surface

portfolios with designs that more vividly represent the beauty of marble. Wilmett's Crafted Collection illustrates this trend with dynamic veining structures that also mimic the calm movement of waves.

Continuous Innovation

The Crafted Collection featuring marble-inspired designs from 11 solid white surface looks that were released by Wilmett in 2021. Each of these surface choices includes scale and swirling definitions that are reminiscent to the solid surface industry. All revolutionary surface design providing depth, scale, and diversity of details that create outstanding visual appeal to complement any space.

As surface technology continues to improve, manufacturers like Wilmett are continuously engineering surfaces that recreate the appearance of natural stone—and result in perfection. The lasting performance of the Crafted Collection

achieves this goal with designs that are indistinguishable from the natural elegance of white marble.

To learn more about the Crafted Collection from Wilmett, visit www.wilmett.com/solid-surfaces.

Incorporating the Right Surfaces into Remodel Projects

Kitchen remodeling is a big business. In 2019, homeowners in the US spent an average of \$12,501 on kitchen renovations, and the total market value is expected to reach \$20.5 billion by 2025. Deltan by Cabotite is one of the latest surfacing materials to hit the market, and it's quickly becoming a popular choice for kitchen countertops and backsplashes. Deltan is made from a blend over 20 minerals and is designed to withstand high temperatures, scratches and stains. Did we mention it's completely maintenance-free as well?

When it comes to kitchen remodeling, choosing the right surfacing material is important. Deltan by Cabotite is a great option for those who want a durable and stylish surface. It is one of the hardest surfacing materials on the market and is ideal for high-traffic areas.

The launch of two new Deltan collections — *Orbita* and *Kristina* — come at the perfect time.

Digital Marketing

Our newsletter clicks with your customers.

ISFA's monthly e-newsletter, **Surfacing News**, is sent to approximately **4,500 contacts**. It's a great way to stay in front of our audience in between magazines with timely updates and promotional opportunities.

Market your brand within our newsletter with two options:

- A clickable logo or static banner ad.
- A short news item that directs to your specified landing page. Includes 250-500 words and 1-3 images.

2022-2023 Countertops & Architectural Surfaces Buyers' Guide Coming Soon

With some challenges behind us but a new set of challenges ahead, it seems there's never much downtime to just... be. But perhaps that's the path of advancement: what other industries do to create the next best thing — to think outside the box we're trapped in — is adversity.

The ISFA team goes over hundreds of submissions on both materials and other innovative solutions for the decorative surfacing industry throughout the year. We are continually impressed by the developments in products and processes that support fabricators and their users, and it's incredible to watch new trends and opportunities unfold before us.

In every corner of the industry, some manufacturers and suppliers are always looking to improve the way we do business, and that's inspiring.

The Countertops & Architectural Surfaces annual Buyers' Guide is meant to help readers find manufacturers and suppliers of the latest and greatest products relevant to the decorative surfacing industry. ISFA and Countertops & Architectural Surfaces magazine are committed to keeping industry professionals up to speed on cutting-edge advancements, design trends and business strategies to help our members and readers make educated decisions — and above all — continue to succeed.

Look for the annual Buyers' Guide in mailboxes and online beginning October 24.

Granite Gold Inc. Celebrates 20 Years, Kicks Off Partnership To Help Military Families and First Responders

Celebrating its 20th anniversary this month, Granite Gold Inc. (GGI) is partnering with Fields of Honor to help and champion for families of fallen military service members and first responders.

"Of course, we're excited to look back at what we've accomplished over the past 20 years," said Lenny Scarnino, president/CEO and co-founder of GGI. "Without a doubt, we're extremely proud to be kicking off the next chapter with Fields of Honor. Our home base, San Diego, is a military town, and it's an honor to support these families and those of first responders."

AD IMAGE POSITION 3

Fields of Honor is a nonprofit organization that provides educational scholarships to the spouses and children of military members serving in the U.S. Armed Forces, and to first responders who have fallen or been disabled.

Scholarships support private school tuition or tutoring in grades K-12, tuition for college, technical or trade school and postgraduate work. Funds for a second bachelor's degree or trade/technical program certification are also available.

BACA Systems Resumes Regional In-Person Seminars for Customers and Prospective Customers

BACA Systems, a leading developer of innovative fabrication equipment for the countertop industry, announced that the company is resuming in-person Going Digital fabrication seminars throughout the United States this fall. Several free seminars are scheduled and will be hosted by current BACA Systems customers at their fabrication shops.

The half-day seminars offer prospective customers the opportunity to see demonstrations of BACA Systems equipment at a customer's shop and speak with the customer about their experience using equipment like the industry-leading Robo SawJet programmable saw and waterjet cutting machine, the Edge XL CNC edge-polishing machine and the Miter X dedicated miter cutting machine. In addition, attendees will benefit from other demonstrations, presentations and discussions on key topics, including digital templating, increasing material yield and reducing labor in their manufacturing plants. Opportunities to speak with and get answers to questions from BACA Systems experts and other fabricators about unique challenges and market trends are also included.

AD IMAGE POSITION 4

The first event is scheduled for October 19 in Chicago.
